

ITS Digital Accessibility

ITS leads the U-M Digital Accessibility Strategic Initiative, a university-wide effort to enable access for all to digital content and systems, by aligning with digital accessibility standards and best practices. We offer tools, training, and support for U-M.

Panorama

Canvas tools for accessibility remediation, guidance, and alternate formats

Grackle

Accessibility checker for Google Docs, Sheets, and Slides

Scanning

Website accessibility scanning and management platform

Reviews

Expert evaluations of applications and websites against standards

Description

The U-M ITS Digital Accessibility team provides services, training, and consultation to make digital content and products at U-M accessible.
