

ITS Internship Program

The Internship Program offers undergraduate, graduate, and certificate-seeking students the opportunity to expand their knowledge and strengthen their skills through a comprehensive, guided learning experience. With diverse opportunities in both technical and non-technical roles, interns engage in meaningful projects that not only foster personal and professional growth, but contribute to the broader university community.

Service Description

The 13-week summer internship program provides students with professional development opportunities, one-on-one mentorship from IT leaders, and hands-on experience within their departments. Interns also collaborate on a cohort project that fosters teamwork, innovation, and exploration. The program culminates in a showcase, where interns present their summer work to the broader Michigan IT community.

Statistics

- 494 interns since 2015
- 7,092 applicants over 12 years
- 10 unit partners across the university system
- 15 Summer Academy students (partnership with Wolverine Pathways)
- 21 interns hired into full-time roles
- 129 non-UM interns

Support

Program information: its-internship-planning@umich.edu or Claire Tucker

Hiring, compensation, staffing: James Markus or Claire Tucker

Intern requests for supervisors open in **November** every year!
